## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/29/03 has been entered; wherein claim 1 was amended.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-8 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mains, U.S. Patent 5,408,907, Fujikawa, U.S. Patent 4,356,871, and Mathews, U.S. Patent 3,911,679.

Mains discloses the invention substantially as claimed including, a single hydraulic circuit system for operating the driven means and extension means. Mains lacks the single charge accumulator.

Mathews discloses that it is old and well known in the art to use a single pump and a single accumulator for the purpose of providing high speed operation of multiple elements of lift truck thereby providing an effective hydraulic system that is inexpensive.

Art Unit: 3724

Fujikawa discloses that it is old and well known in the art to use hydraulic circuit systems for driving tools with extension means, wherein charge accumulators are used for delaying the time of engagement of the tool and extension means (e.g. column 4, lines 5-15) for the purpose of preventing damage to the tool.

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to use a single hydraulic circuit and accumulator with the device of Mains in order to provide an effective and inexpensive hydraulic driving circuit.

### ***Response to Arguments***

4. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
